## WORK EXPERIENCE

---

### GRUPO VENIU (Small Company of Software Services)

Guadalajara, JAL

Project Manager, Developer & Support

Oct 2022 – Feb 2023

- Developed applications using Python for the software ERP “Odoo” about general uses for clients and their businesses.
- Engaged with customers about requirements for their software design and implementation.
- Implemented software products in businesses (Gym, Schools, Stores)

## UNIVERSITY PROJECTS

---

### IMAGE FILTER JAVA API

April - May 2022

- Created an API using Java and its environment that converts images with different filters, by changing manually the color of each pixel.
- Developed in pairs, under pressure and with short time to deliver it.

### CLASS SCHEDULER WEBSITE – JAVASCRIPT, HTML/CSS

Nov - Dec 2022

- Designed and developed a Functional Website focused to create a class scheduler for students in our University using real classes and its algorithm is intelligent enough to prevent classes from overlapping.
- Stack used for Front-end : HTML, CSS, Bootstrap, and for Back-End: JavaScript, Node JS, MongoDB, JWT(Authentication).
- Created in a group of 3, in a period of one month.
